WASHINGTON D.C. — We use little words in our speech all the time. They are used across the globe in a variety of languages, but we rarely discuss their grammatical purpose, how they are used, and how they shape our relationship with language. The new book, *Little Words: Their History, Phonology, Syntax, Semantics, Pragmatics, and Acquisition*, integrates the views and findings of different research in little words into one professional source to be used within and across disciplines.

This unique volume examines the functions and change in the use of clitics, pronouns, determiners, conjunctions, discourse particles, auxiliary/light verbs, prepositions, and other “little words” that have played a central role in linguistic theory and in language acquisition research. Leading national and international scholars present advanced research in phonology, morphology, syntax, semantics, discourse function, historical development, variation, and acquisition by children and adults. Languages studied include English, Spanish, French, Romanian, German, Norwegian, Swedish, Slavonic, Korean, and Medieval Leonese.

*Little Words* comes out of the Georgetown University Round Table on Languages and Linguistics (GURT) of 2007 hosted by the faculty of Languages and Linguistics at Georgetown University. It joins the ranks of other books in the series that are known for their excellence in linguistic scholarship. Georgetown University Press has published the proceedings from this distinguished conference for over 40 years.

**Ronald P. Leow** is an associate professor of Spanish applied linguistics and director of Spanish Language Instruction at Georgetown University.

**Héctor Campos** is an associate professor of Spanish and Portuguese, linguistics, and modern Greek at Georgetown University.

**Donna Lardiere** is an associate professor of linguistics at Georgetown University.
