THE ART OF TEACHING RUSSIAN

Evgeny Dengub, Irina Dubinina, and Jason Merrill, Editors

The Art of Teaching Russian offers Russian-language practitioners current research, pedagogical thinking, and specific methodologies for teaching the Russian language and culture in the twenty-first century. With contributions from the leading professionals in the field, this collection covers the most important aspects of teaching the Russian language.

The book begins with an overview of the past and current trends in foreign language education and in Russian instruction in the United States. The next section explores the effects of ACTFL’s World-Readiness Standards on the field, followed by the presentation of different pedagogical approaches to teaching the Russian language at various levels of proficiency. A section on curriculum and materials development covers corpus-based approaches and considerations for representation and inclusion. Throughout the collection as well as in a section devoted to the topic, essays emphasize how to develop students’ intercultural competence. The collection concludes by showing how technology use in the Russian-language classroom can enrich students’ learning.

The Art of Teaching Russian includes practical approaches for successful teaching, supported by original research. Teachers and graduate students will rely upon this collection to enhance their Russian-language instruction.

“This well-organized and coherent volume will undoubtedly push the field forward with its many and varied approaches to language teaching.”

RODNAYA RECH’
An Introductory Course for Heritage Learners of Russian

Irina Dubinina and Olesya Kisselev

Rodnaya rech’, an introductory textbook for heritage learners, addresses the unique needs of students who have at least Intermediate level listening and speaking skills on the ACTFL scale but who have underdeveloped or nonexistent literacy skills. With an emphasis on conceptual understanding of vocabulary and grammar, Rodnaya rech’ builds students’ literacy skills and teaches them to strategically use the linguistic intuition they have gained as heritage speakers while strengthening all four skill areas: listening, speaking, reading, and writing.

With a textbook designed for in-class work and an Electronic Workbook containing all homework activities and texts for reading comprehension, Rodnaya rech’ can be used as the main course material either in an intensive one-semester class or at a more measured pace over two semesters. This book is flexible enough to be used in specialized heritage or in mixed classes. It can also support independent study and learning in less formal settings, such as community schools.

“Dubinina and Kisselev are at the top of their game: applying modern, innovative teaching methods, bringing to the fore the rich culture behind modern spoken Russian, and engaging their students in a sophisticated dialogue. This textbook will be a gold standard for future textbooks designed for heritage speakers of different languages.”

Faces of Contemporary Russia
Advanced Russian Language and Culture

Olga M. Mesropova

Faces of Contemporary Russia is a one-semester textbook for high-intermediate to advanced level Russian students that aims to develop students’ linguistic proficiency by examining significant personalities in current Russian culture. In addition to introductory and concluding chapters, the book features twelve individuals (one per chapter), drawing from a range of areas such as arts, sports, journalism, and business. While upper-level Russian textbooks tend to emphasize grammar and reading more traditional works of Russian literature, this book instead seeks to primarily engage students in learning about and discussing the breadth of contemporary Russian culture while weaving the study of grammar and vocabulary into those discussions. In addition to readings and in-class communicative activities, the book also features guided research assignments that encourage students to make use of the many personality interviews and YouTube clips available online.

“Faces of Contemporary Russia offers learners the chance to acquire deep cultural literacy in the realm of post-Soviet Russian media, politics, athletics, and the performing arts, while also developing the lexicon and syntactical strategies that will propel them to advanced level proficiency in reading, speaking and writing in Russian.”

—Molly T. Blasing, assistant professor of Russian studies, University of Kentucky

256 pp.  August 2019
ISBN 978-1-62616-671-4, paper, $69.95 / £52.50

Note on the personalities

This book is not exhaustive and therefore does not feature every personality covered in the course. This course was designed to provide a broad understanding of contemporary Russian culture and society, and therefore prioritizes figures who are prominent in the areas covered by the course. The decision of which personalities to feature was based on factors such as their influence, popularity, and the relevance of their work to the topics covered in the course. The book is not intended to be a comprehensive guide to all aspects of contemporary Russian culture, but rather a tool for exploring and understanding the broader trends and developments in Russian society.

Course and syllabus planning

This book can be used as the main text for a full academic semester covering a wide range of Russian language and culture topics. It is designed to be flexible and can be adapted to fit the specific needs and interests of individual instructors and courses. The book provides a comprehensive overview of contemporary Russian culture, and can be used as a basis for developing a unique and engaging syllabus that meets the needs of your students. Whether you are teaching a course on contemporary Russian culture, language, or both, this book is a valuable resource for helping your students develop a deeper understanding of Russian society and culture.

TEACHING ADVANCED LANGUAGE SKILLS THROUGH GLOBAL DEBATE

Theory and Practice

Tony Brown and Jennifer Bown

Through debate, students learn how to make hypotheses, support their conclusions with evidence, and deploy the rhetoric of persuasion in the target language. Though this method provides an exciting pedagogy for moving students from the advanced to the superior level, there is a paucity of materials available for instructors who wish to plan a curriculum focused on debate. Teaching Advanced Language Skills through Global Debate: Theory and Practice provides teachers with both the theoretical underpinnings for using debate in the foreign language classroom as well as practical advice for developing reading, listening, writing, and speaking skills through debate. It discusses task-based language learning and helps instructors design debate-related tasks for the classroom.
